* Last four digits should be used to designate material (1215, 1285, etc.). For certain materials and configurations, a minimum order requirement may apply.

Additional sizes are available. For custom sizes, drawings must be provided. Part numbers will be assigned by Chomerics.

Molded D- and O-Rings

Chomerics' D-ring and O-ring gaskets provide moisture/pressure sealing and EMI/EMP shielding when compressed in a properly designed groove. They are interchangeable with standard non-conductive seals of the same dimensions. Rings with I.D.s greater than 2 in. (51 mm) can be made by splicing extruded materials rather than by molding if groove corner radii are generous. Consult Chomerics before ordering.

Note: Grooves should be designed to assure 10 to 20% deflection of the gasket, and 100% maximum groove fill when groove dimensions are on the low side of allowable tolerance and gasket dimensions are on the high side.

Ordering Procedure

Select the part number from Table 2 (D-rings) or Table 3 (O-rings) which follow. The last four digits designate the material. We recommend CHO-SEAL15 material for the highest level of shielding effectiveness; CHO-SEAL1285 material for the best combination of shielding effectiveness, corrosion resistance, weight, cost and temperature range; and CHO-SEAL208 for the highest level of corrosion resistance.

Note: Tooling charges may be incurred for some parts.
